JOIN US for a **live webinar** with Greg Gonye, Ph.D., Principal Field Applications Scientist at Purigen Biosystems where he will be discussing the many benefits of the Ionic® Purification System currently available at the **UNC BioSpecimen Processing Facility**. By using isotachophoresis to extract pure, intact DNA and RNA from samples, the Ionic system is able to provide researchers higher yield, higher quality, and better data from their samples.

- **Higher Yield, Higher Quality and Better Data**
  3.5x more DNA and 2x more RNA from FFPE (on average)
- **No Beads, Columns, or Fixed Surfaces**
  Less fragmentation and no risk of contamination from beads or wash solvents
- **No Bias Towards Length or GC Content**
  Extract targeted nucleic acid regardless of fragment length or GC content
- **Efficient Workflow and Simple Lysis**
  Deparaffinize, lyse, and de-crosslink FFPE in a single reaction without using harsh chemicals

Greg Gonye, Ph.D.
Principal Field Applications Scientist
Purigen Biosystems

DATE / TIME

Wednesday, March 31

1:00 – 2:00 PM EST
