Purigen Workshop and Platform Demonstration

Jahrestagung der Deutschen Gesellschaft für Pathologie

A Breakthrough in FFPE Analysis

Next-Gen DNA/RNA Extraction for NGS

In this workshop, we will demonstrate the use of the Ionic® Purification System to recover increased yields of high-quality DNA, RNA, or miRNA from FFPE tissue samples that prove challenging for conventional methods. The Ionic System uses Isotachophoresis to increase quantity and quality of nucleic acids extracted from FFPE and requires 75% less hands-on time than column- or bead-based methods. Come learn why leading cancer research and pathology labs are utilizing Ionic to simultaneously get more out of their samples and streamline laboratory operations.

Alex Stretton, Ph.D.
Principal FAS, Purigen Biosystems
